Introduction

The *Transit Profiles: 2018 All Reporters* is one of three profiles provided in the National Transit Database (NTD) Annual Report. This volume consists of individual profiles for all agencies filing an NTD Annual Report for 2018. Profiles contain general, financial, and modal data, as well as performance and trend indicators.

For the 2018 report year, 2,942 transit agencies submitted reports:

- 529 agencies submitted full reports,
- 396 agencies submitted Reduced Reporting reports,
- 4 agencies submitted Separate Service reports,
- 8 agencies submitted Planning reports,
- 8 agencies submitted Building reports,
- 1,167 agencies submitted Rural General Public Transit reports,
- 87 agencies submitted Intercity Bus reports,
- 538 agencies submitted Reduced Asset reports,
- 134 agencies submitted Tribal reports
- 9 agencies received Reporting Waivers and Failure to Reports

2,352 agencies, comprising Full, Reduced, Separate Service, Planning, Building, Rural General Public Transit, Tribal, and Tribal Subsidy Reporters, are included in the 2018 NTD Transit Profiles. NTD does not produce profiles for Intercity Bus reporters and agencies receiving Reporting Waivers.

General information includes urbanized area (UZA) statistics, service area statistics, service consumption (system wide), service supplied (system wide) and database information.

Financial information includes sources of operating funds expended, summary of operating expenses (OE), and sources of capital funds expended. Two pie charts graphically depict sources of operating funds expended and capital funds expended. The remainder of the profile presents information separated by mode.

Please note:

- Operating expenses (OE), fare revenues, vehicles operated in maximum service, and services supplied and consumed by mode do not include purchased transportation (PT) data reported by the other party.
- Fixed Guideway directional route miles (FG DRM) include the total DRM at the agency's fiscal year end (FYE). FG segments used by more than one agency are included for each agency reporting the segments.
- Performance measures are derived from individual mode characteristics and represent cost efficiency, cost effectiveness, and service effectiveness. Graphs highlight selected performance measures over the prior ten years for the two modes with the highest ridership.

Anomalies may exist in these graphs as the result of a report not received, a waiver granted, data deleted after validation, or data deemed questionable in a particular year.

Sections

- [2018 National Transit Profiles Reporting Agencies](#) – This section provides individual summaries of reporter data collected during the 2018 Report Year.
- [Transit Agencies Receiving FTA Approved Reporting Exemptions](#) – This section identifies agencies receiving FTA approved reporting exemptions (waivers) in the 2018 report year.
- [Profile Data Elements Cross-Reference](#) – This section provides a cross-reference identifying where each data item in the profiles can be located in an agency's National Transit Database report, as well as the formulas used in calculating these items.
