

2024 Transit Asset Management (TAM) Roundtable

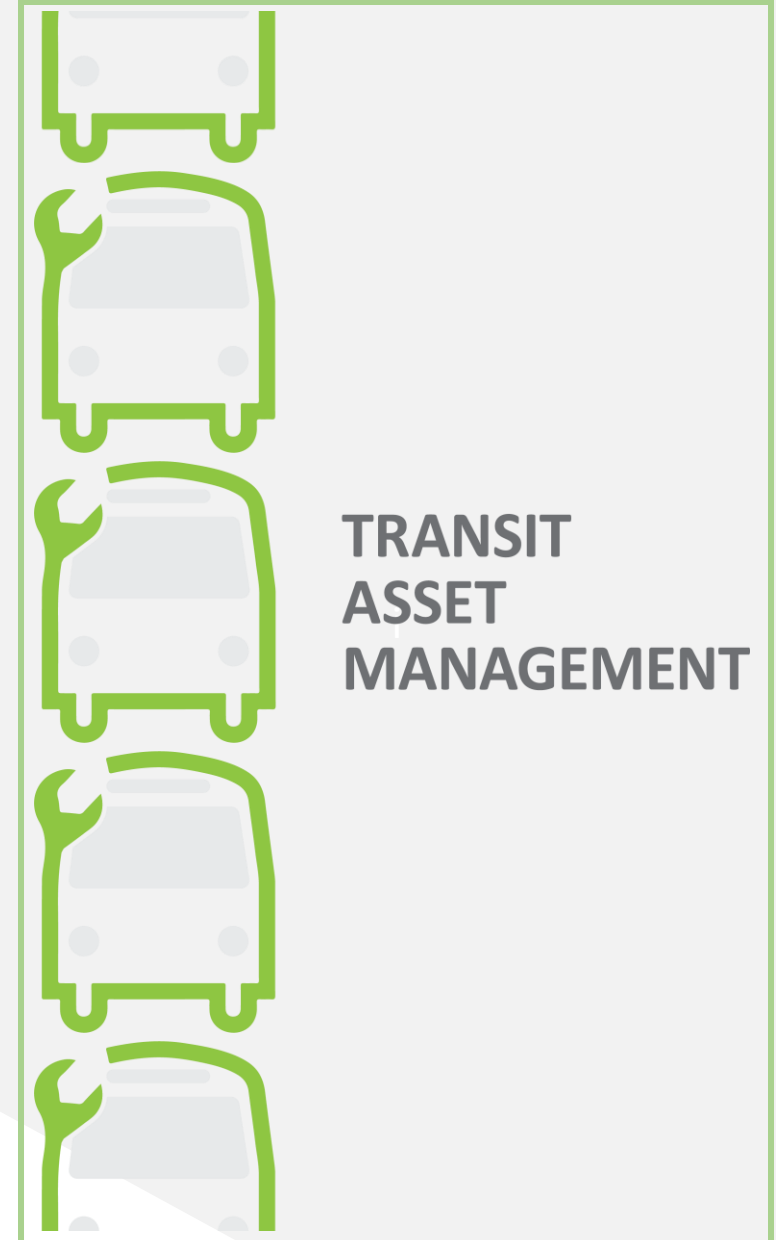

Theme: Continuous Improvement

Chicago, IL

July 30-31, 2024

U.S. Department of Transportation
Federal Transit Administration

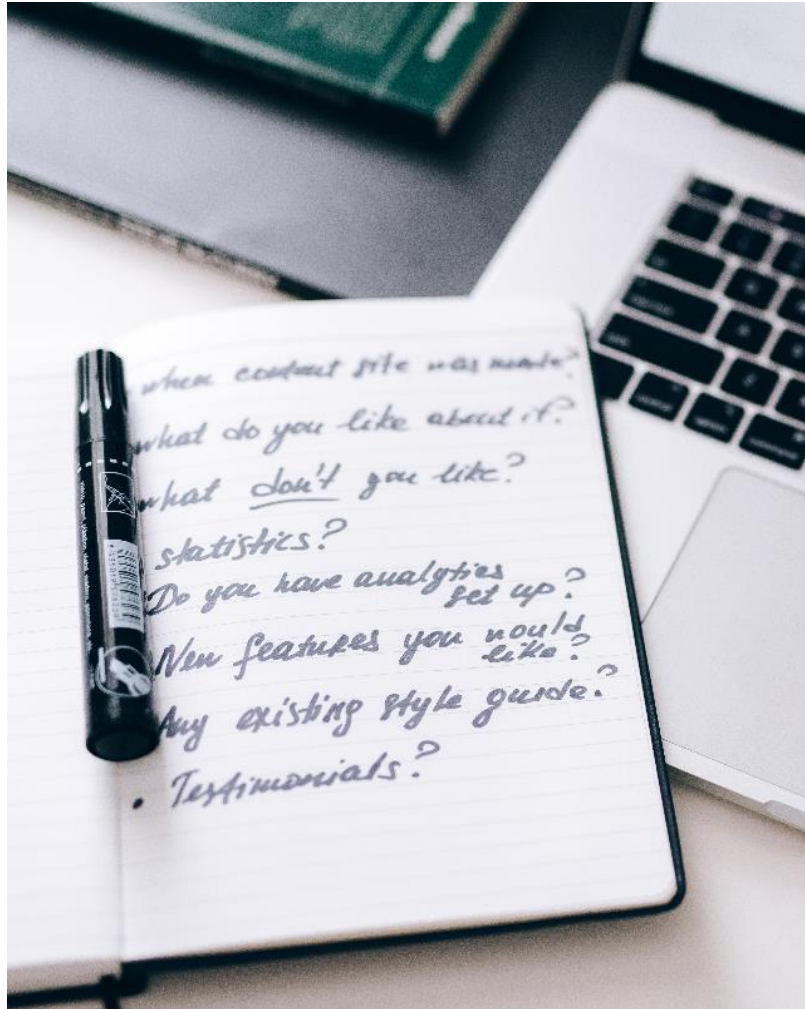

Agenda: Day 1

Time	Session
9:00 AM	Welcome
9:20 AM	Round Robin Introductions
10:15 AM	<i>Break</i>
10:25 AM	Strategies for Continuous Improvement Session
11:05 AM	Small Group Discussion and Report Back
11:45 AM	<i>Lunch (on your own)</i>
1:00 PM	CTA Keynote Speakers
1:30 PM	Q&A
1:45 PM	Tour(s)
5:00 PM	<i>End of Day 1</i>
6:00 PM	<u>Optional</u> Social Gathering

Agenda: Day 2

Time	Session
8:15 AM	<u>Optional</u> Peer to Peer Chat Session
9:00 AM	Welcome
9:20 AM	FTA TAM Program Updates
10:00 AM	<i>Break</i>
10:15 AM	TAM State of the Practice Review Panel Session
11:10 AM	Small Group Discussion and Report Back
12:00 PM	Wrap up & Evaluation
12:15 PM	<i>End of Day 2</i>

Welcome: Day 1

TAM Roundtable – IndyGo Maturity Assessment

Background on IndyGo

Tier I

- Tier I with a Group TAM (3 eligible subrecipients)
- ~200 FR revenue vehicles, ~80 paratransit cutaway vehicles
- ~7 M boardings
- Red Line BRT with Purple opening this year and Blue getting under construction
- Two main facilities (one garage), one paratransit, one transit center, two charging, and dozens of rapid transit stations

TAM Timeline

- Created first plan in 2018 (in-house)
- Implemented plan in 2019, 2020
- Updated plan in 2022 (in-house)
 - **Completed FTA self-driven maturity assessment – Pros/Cons**
- Hired Cambridge Systematics to assist with TAM knowledge
 - Two primary tasks
 - Software Solutions (sub)
 - TAM Maturity Assessment

TAM Maturity Assessment

Highlights

- Completed numerous interviews with dozens of staff
- Reviewed almost all aspects of asset management in the agency
- Completed maturity assessment including a list of areas to improve maturity and associated tasks

IndyGo TAM Next Step Actions

Subject Area (XX)	0 - Innocent 1 - Aware 2 - Developing 3 - Competent	Action XX: Name - with short description of what needs to be done if needed	Additional notes as to what the action item a
Subject Area (Subject Number)	Subject Score	Action Item	Additional Not
Asset Decommissioning and Disposal (21)	2 - Developing	Action 1: Incorporate Additional Info. into Assets Disposal and Transfer Form - Include sale price (if applicable) and a qualitative description of disposal/transfer as supplement	This would serve to improve the details around provide for data to base depreciation models
Operations and Maintenance Decision-Making (7)	1 - Aware	Action 1: Develop a maintenance, repair, and replacement plan – this can be used as the basis for the development of a program for continuous renewal, replacement, and refurbishment of transit assets	One of the evidence documents provided was developing a maintenance repair and replacer

TAM Continuous Improvement

Ways We Strive to Improve

- Participate in peer sharing (FTA/Volpe Center TAM Working Group 2023)
- Hire outside consultants to review (CS 2022-2024)
- Hire internal capacity (Strategic Planner)
- Better document processes
- Support better documents/process across the agency (CS On-Call contract)

Continuous Improvement New Asset Identification July 2024

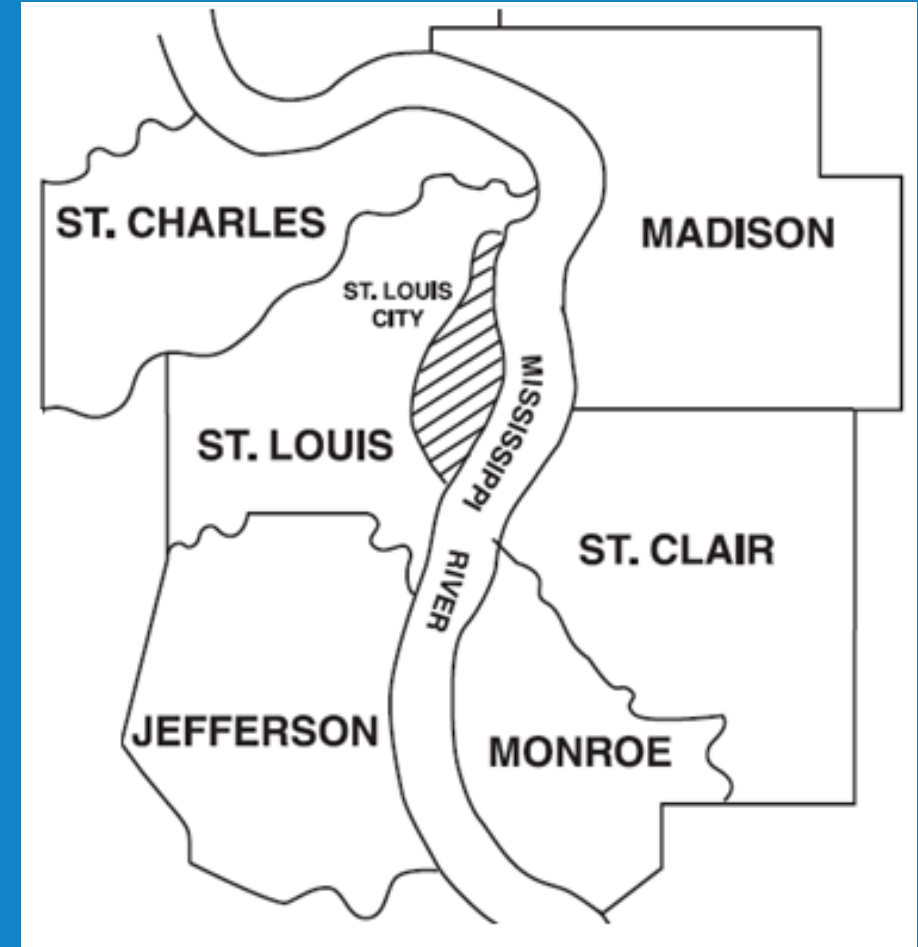

Sheila Hockel

Metro Transit, St. Louis

Bi-State Development

- Established in 1949 through an interstate compact between Missouri & Illinois
- Can cross local, county and state boundaries to plan, construct, maintain, own and operate facilities and infrastructure
- Authorized to issue revenue bonds, collect fees and receive federal, state and private funds
- Bi-State Development operates the Metro Transit system in St. Louis County, St. Louis City and St. Clair County

Metro Transit

MetroBus

- 500+ square mile service area
- 300-vehicle bus fleet includes 24 battery-electric buses

MetroLink

- 38 MetroLink stations
- 46 miles of rail in Missouri and Illinois

Metro Call-A-Ride

- Paratransit service
- Fleet of 120+ wheelchair lift-equipped vans

MAP 21 The Start

- Moving Ahead for Progress in the 21st Century 2012
 - Safety & Asset Management
- Public Transportation Agency Safety Plan (PTASP) 2020
 - MetroLink State Safety Oversight (SSO)
 - Addition of bus and paratransit to SSO type auditing
- PTASP audit of Procurement

The Audit

- PTASP Section 12 Procurement Department
- Safety reviews
 - Procurement specifications,
 - Designs for facilities, equipment, or systems
- May affect the MetroLink safety of
 - employees
 - passengers

New Asset Identification SOP

- How and Why
- Purchase requisition for
 - Rolling Stock
 - Equipment
 - Contracts

Purchase Requisition Review

- Services – not tracked
 - Uniform services
 - Cleaning services
- Contracts – not tracked

Only PR numbers will be recorded at this time. March 2024.
194058 194057 194052 193192 194600 194469 194740 194713 194704 194685 178142		Not tracked in EAM. Only PR numbers will be recorded at this time. March 2024.

Purchase Requisition Review

- New Asset
 - Asset is not tracked, or
 - Asset is tracked in Enterprise Asset Management (EAM) program
 - PM/asset owner is contacted
 - EAM asset identification is verified
 - New Equipment Form

Purchase Requisition Review

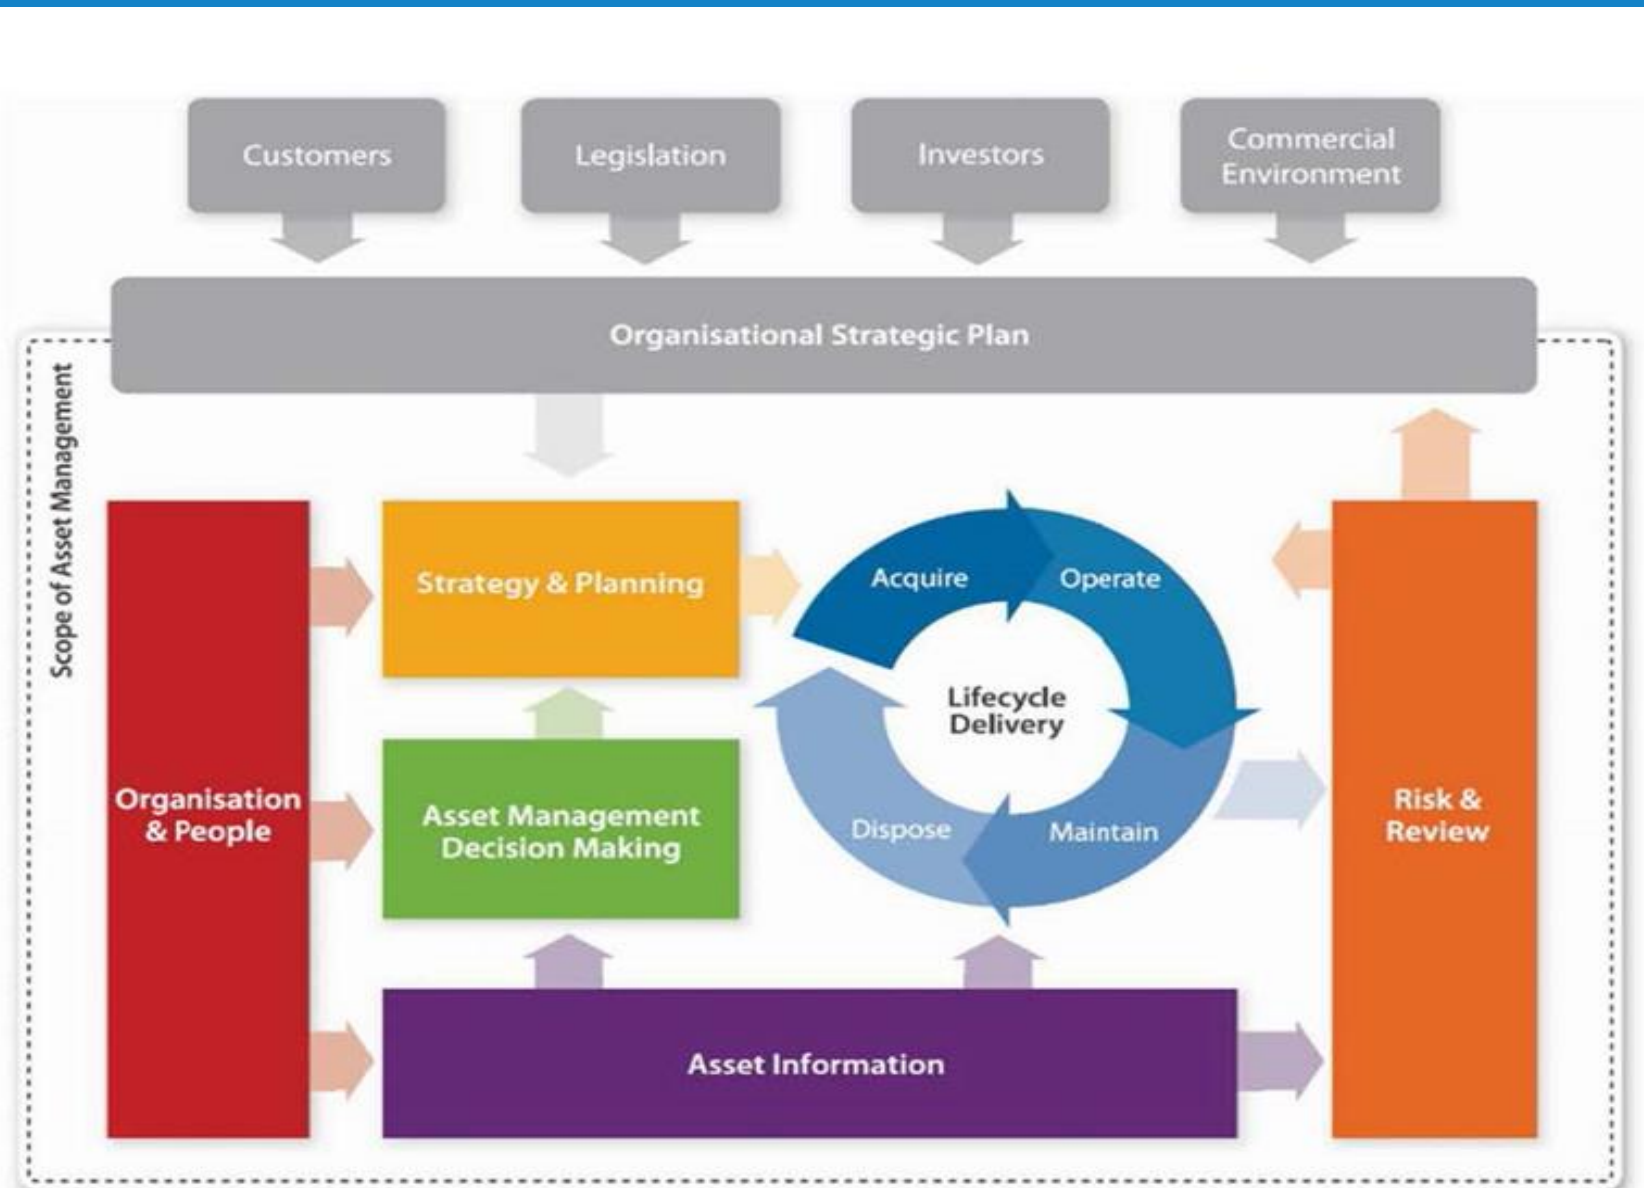

Unit	DESCRIPTION	From	SOURCE OF INFORMATION	Status of addition (add date of each update)	Completed
EW- train jack	EwingTrain Jack Replacement	Hamm, Kelly	Purchase Requisition 194500	3-22-24 email to parker, huggans, hamm	
TC-NB chargers	Repair charger number two at North Broadway and Taylor Bus Transit center. The repairs would bring the electrical Charging system to full capacity.	Adkins, Kent	Purchase Requisition 194700	3-28-24 email sent to adkins and o'hara. Chargers are condition of 5. No additional action tacken.	x

More Sources of New Assets

- New Equipment Form
- Form 0221 Request for Disposal and Replacement of Fixed Asset
- Annual Asset Condition Review
- Leased and Other Non Revenue Vehicles
- Revenue Vehicles
- Procore Project Close out

Observations

- This SOP has been revised more than any other SOP.
- SOP has connected the dots between departments and TAM.

 IAM approval for use by BSD/Metro 4-6-21.

Question to the Group

- What other sources of new equipment is there?

metro

Audience Q&A

Small Group Discussion Questions

Has your organization attempted to evaluate your TAM program and plan?

- *If so, please share your experience.*
 - What were the findings or takeaways?
 - What steps did you take to coordinate with others to plan for the implementation of any related improvements to your TAM program or plan?
 - What were the biggest obstacles?
- *If not, please discuss:*
 - What has hindered assessment efforts,
 - Specific TAM areas in your organization that would benefit from an assessment, and
 - Any future plans for continuous improvement.

*Chief Administrative Officer,
Chicago Transit Authority*

Agenda

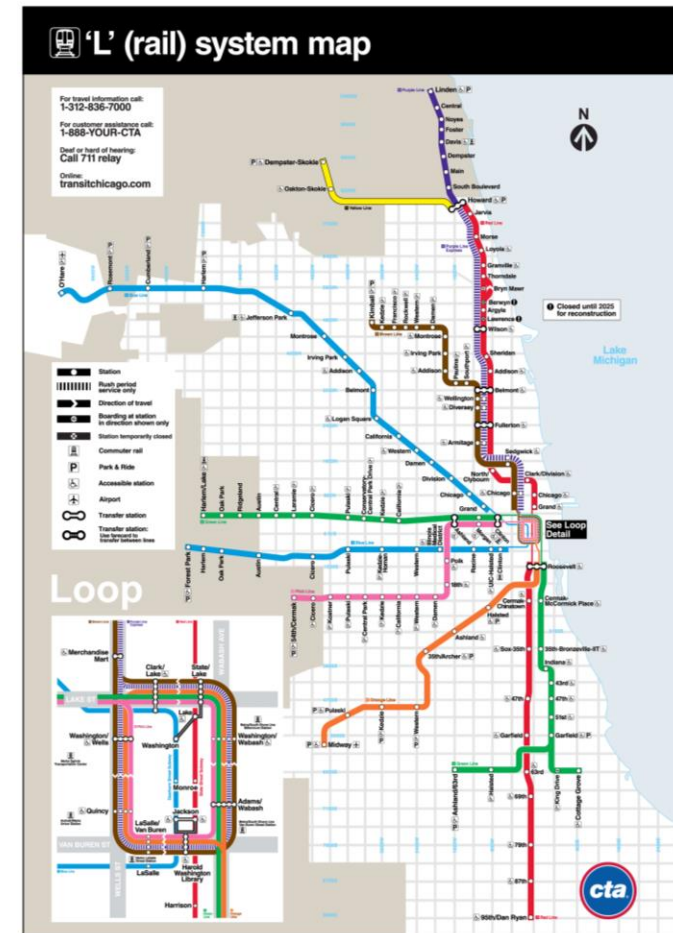

-  CTA Overview
-  TAM at CTA Overview
-  TAM Key Components
-  Projects
-  Conclusion

CTA Overview

CTA Overview

- **2nd largest** in the nation, serving 3.2M residents
- **Extensive coverage:** 310 sq. miles, including Chicago and 35 suburbs
- **Robust network:** 8 rail lines / 145 rail stations and 127 bus routes / approx. 11,000 bus stops
- **Impressive fleet:** 1,500 rail cars, 1,900 buses
- **Vital commuter lifeline:** 912.7k avg weekday riders (2024)
- **Significant impact:** 279.7m riders annually (2023)
- **Critical regional support:** Links to Pace and Metra
- **Major contributor:** 81% of public transit trips in the six-county area
- **Accessibility:** 24/7 rail service, with connections to two airports

TAM at CTA

CTA TAM Overview

- The CTA has a TAM business model that prioritizes and manages assets to minimize the total cost of owning and operating them while delivering the desired service levels. In doing so, we increase the ability to:
 - Operate safely
 - Meet regulatory and statutory obligations
 - Significantly reduce the cost of managing assets over their lives

CTA TAM Overview

2009 - 2016

Development of a regional capital needs analysis and Capital Optimization Support Tool (COST Model)

2012 - 2013

CTA conducted Facilities Condition Assessments at maintenance facilities and substations

2012

CTA began to re-implement the Infor-based work order system, to migrate data into a single enterprise asset management system

2016 - 2017

CTA retained WSP USA, Inc. to assess CTA's asset management practices and helped to develop CTA's first TAM Plan

2018

CTA issues TAM / SGR Policy via Executive Order and a dedicated Transit Asset Management team is established and staffed & the first FTA-compliant TAM Plan is issued

2022

Quadrennial TAM Plan update completed and reissued

State of Assets

State of Assets

The condition ratings used in this report are generated by the RTA's COST Model: an altered version of the FTA's TERM Lite Model. All values assume there are no replacements or rehabilitations unless otherwise stated. All values are current unless otherwise stated.

Current Condition Rating Distribution by Asset Type

Condition Rating ● Poor: < 2 ● Marginal: 2 - 3 ● Good: > 3

State of Assets

State of Assets

Percentage of Asset by Condition

TAM Key Components

TAM Key Components

Inventory of Assets

- Cataloging all assets including buses, railcars, stations, equipment, and infrastructure

Condition Assessment

- Regular evaluations to determine the health and performance of assets

Decision Support Tools

- Software and analytical tools that assist in decision-making

Investment Prioritization

- Ranking and scheduling investments based on data-driven analysis

Inventory of Assets

Facilities

- 600+ assets - includes buildings, building components, equipment, storage yards

Stations

- 160+ assets - includes rail stations and parking lots

Guideway Elements

- 10,000+ assets - includes structures, trackwork, crossings, ties, turnarounds, etc.

Rolling Stock

- 3,800+ assets – includes revenue and non-revenue vehicles

Systems

- 1,200+ assets - communications, electrification, substations, utilities, etc.

Facility Condition Ratings

Stations - Breakdown Categories

The condition ratings used in this report are generated by the CTA's Facility Condition Rating Report.

Stations with Lowest Scores by Sub-Category

Breakout Score Definitions

Conveyance Score Escalators, Elevators

Electrical Score Electrical Service & Distribution, Lighting Systems

Equipment Score Fare Collection Equipment

FPLS Score Fire Alarm and Detection System

HVAC Score HVAC

Shell Score Headhouse Roofs, Exterior Shell, Exterior Paint, Canopies & Gutters

Interiors Score Flooring & Walls, Interior Paint, Platform Tactile Edge, Rail Terminal Interior Finishes, Platform Deck

Site Score Pavement, Bus Canopy Paint/Finishes, Drainage, Exterior Lighting, Signage, Perimeter Fences & Gates

Structure Score EAM Structure/Bent Inspection, Crash Barrier Walls, Elevator Shafts, Escalator Enclosures, Station House/Enclosure/Mezzanine, Platforms, Ramps, Stairs, Subway Tubes, Cross-Over Bridges

Bus Condition Distribution

- 2,155 total buses
- 1,847 40-foot buses and 308 60-foot buses
- 61% of our buses were put into service between 2000 and 2009
- Plan to purchase 500 40-foot buses to replace the oldest of the fleet

Bus Fleet Reliability

New Vehicles

- Over 50% of the 40-foot buses will age out over the next few years. This requires a major ongoing replacement program of 100 - 150 buses per year. Additionally, 100% high-capacity articulated 60-foot buses will age out by 2027.

Fleet w/o Replacement and Retirement

	2024	2025	2026	2027	2028
% of Fleet Past ULB	30.1%	45.1%	57.9%	61.3%	61.3%
Average Fleet Age (Years)	12.2	13.2	14.2	15.2	16.2

Fleet w/ Replacement and Retirement

	2024	2025	2026	2027	2028
% of Fleet Past ULB	23.4%	31.7%	40.5%	38.4%	29.3%
Average Fleet Age (Years)	11.1	11	11.3	11.3	10.4

Existing Vehicle Maintenance and Overhaul

- Transit buses require an overhaul after 6-7 years to ensure reliability over their full 14-18 year lifespan.

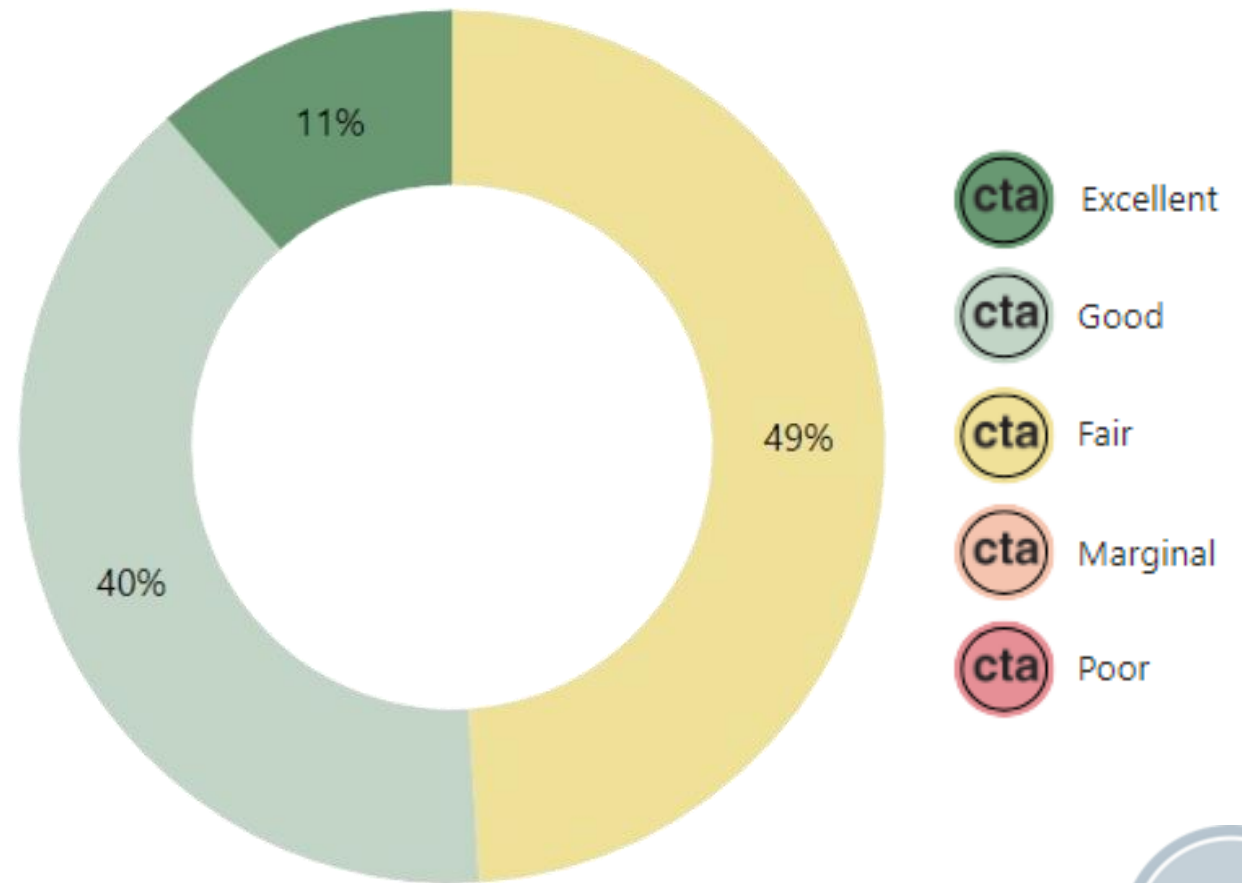

New Electric Bus Technology

- 200 fully electric buses and additional charging facilities

Railcar Condition Distribution

- 1,520 total railcars
- 48% of CTA's railcars were put into service between 1981 and 1994
- 49% of fleet has a fair condition rating and will need to be replaced or overhauled soon
- Plan to purchase 800 railcars to replace the oldest of the fleet

Rail Fleet Reliability

New Rail Cars

- 26% of railcars are currently past their useful lives. This requires a major ongoing replacement program of 100 railcars per year.
- An additional 22% of railcars will surpass their useful lives by 2028.

	Fleet w/o Replacement and Retirement					Fleet w/ Replacement and Retirement					
		2024	2025	2026	2027	2028		2024	2025	2026	2027
% of Fleet Past ULB	31.0%	31.0%	36.1%	48.0%	48.2%	26.1%	19.5%	17.9%	23.7%	21.1%	
Average Fleet Age (Years)	22.9	23.9	24.9	25.9	26.9	20.6	18.8	17.1	15.6	15.1	

Existing Rail Car Overhaul

- Transit rail cars require quarter-life and life-extending overhauls to ensure reliability over their full 31-34 year lifespan.

New Technology

- Replace obsolete video system on rail cars to ensure safety and security of customers and employees.

Decision Support Tools

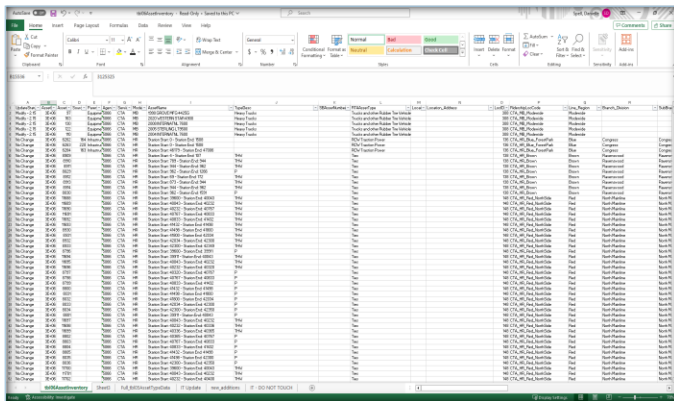

Data visualizations and dashboards are crucial tools to convey a large quantity of dense information to CTA asset managers. Such interactive tools may take the form of “canned” or built-in reports from EAM systems or may stand alone and draw on the underlying data from EAMs. The levels of development of such tools vary considerably within CTA by function and system.

The TAM Team primarily uses the following tools:

Decision Support Tools – RTA's COST Model

RTA's COST Model is an MS Access based analysis model (based on FTA's TERM Lite Model) designed to perform multiple analyses for RTA and its three Service Boards; CTA, Metra and Pace.

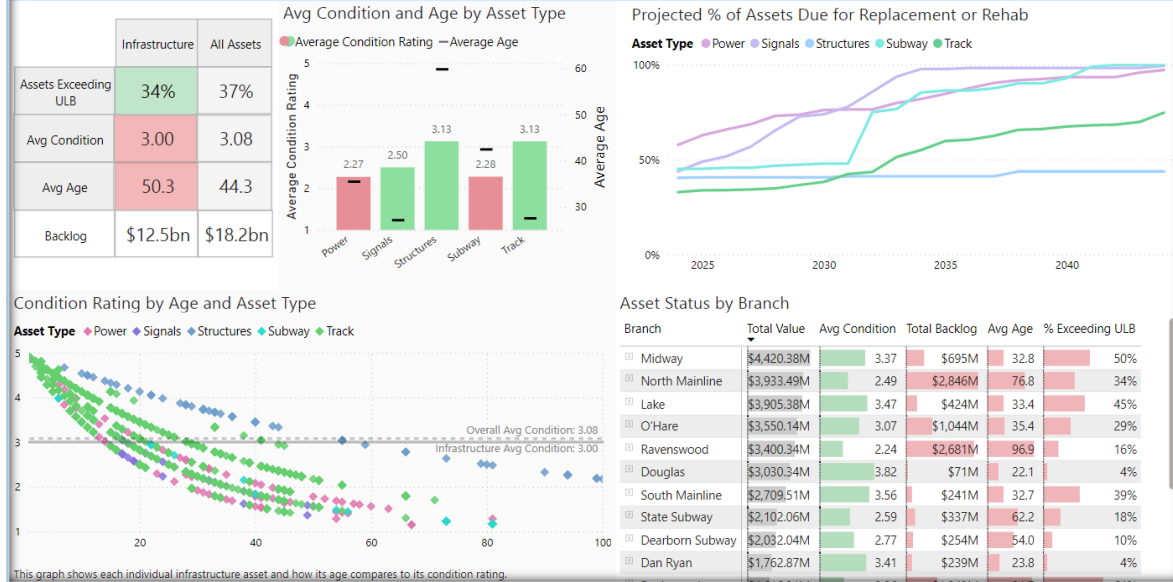

Decision Support Tools - PowerBI

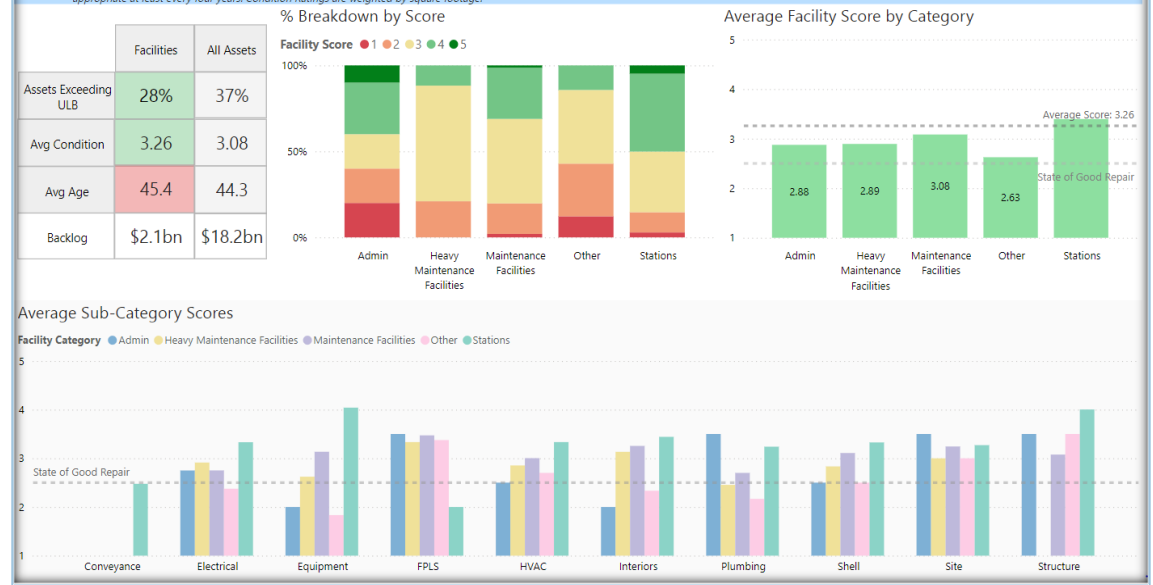

State of Assets - Infrastructure

The condition ratings used in this report are generated by the RTA's COST Model: an altered version of the FTA's TERM Lite Model.

Facilities Condition Ratings Summary

A minimum of 25% of facilities are rated each year. All facility condition rating scores will be reviewed and updated as appropriate at least every four years. Condition Ratings are weighted by square footage.

Decision Support Tools - Databases

MMIS

Decision Support Tools - ArcGIS

The CTA maintains an internal GIS database to display geographic data. The TAM Team uses the data collected from the Facilities Condition Assessments to display conditions of maintenance buildings, stations, and parking facilities.

TAM Category	Year Built	MFD Facility Type	MFD Code	Year last Assessed	Opening Rating	Facility Score

Decision Support Tools - Resulting Effects of Strategy

By using these support tools, TAM is able to:

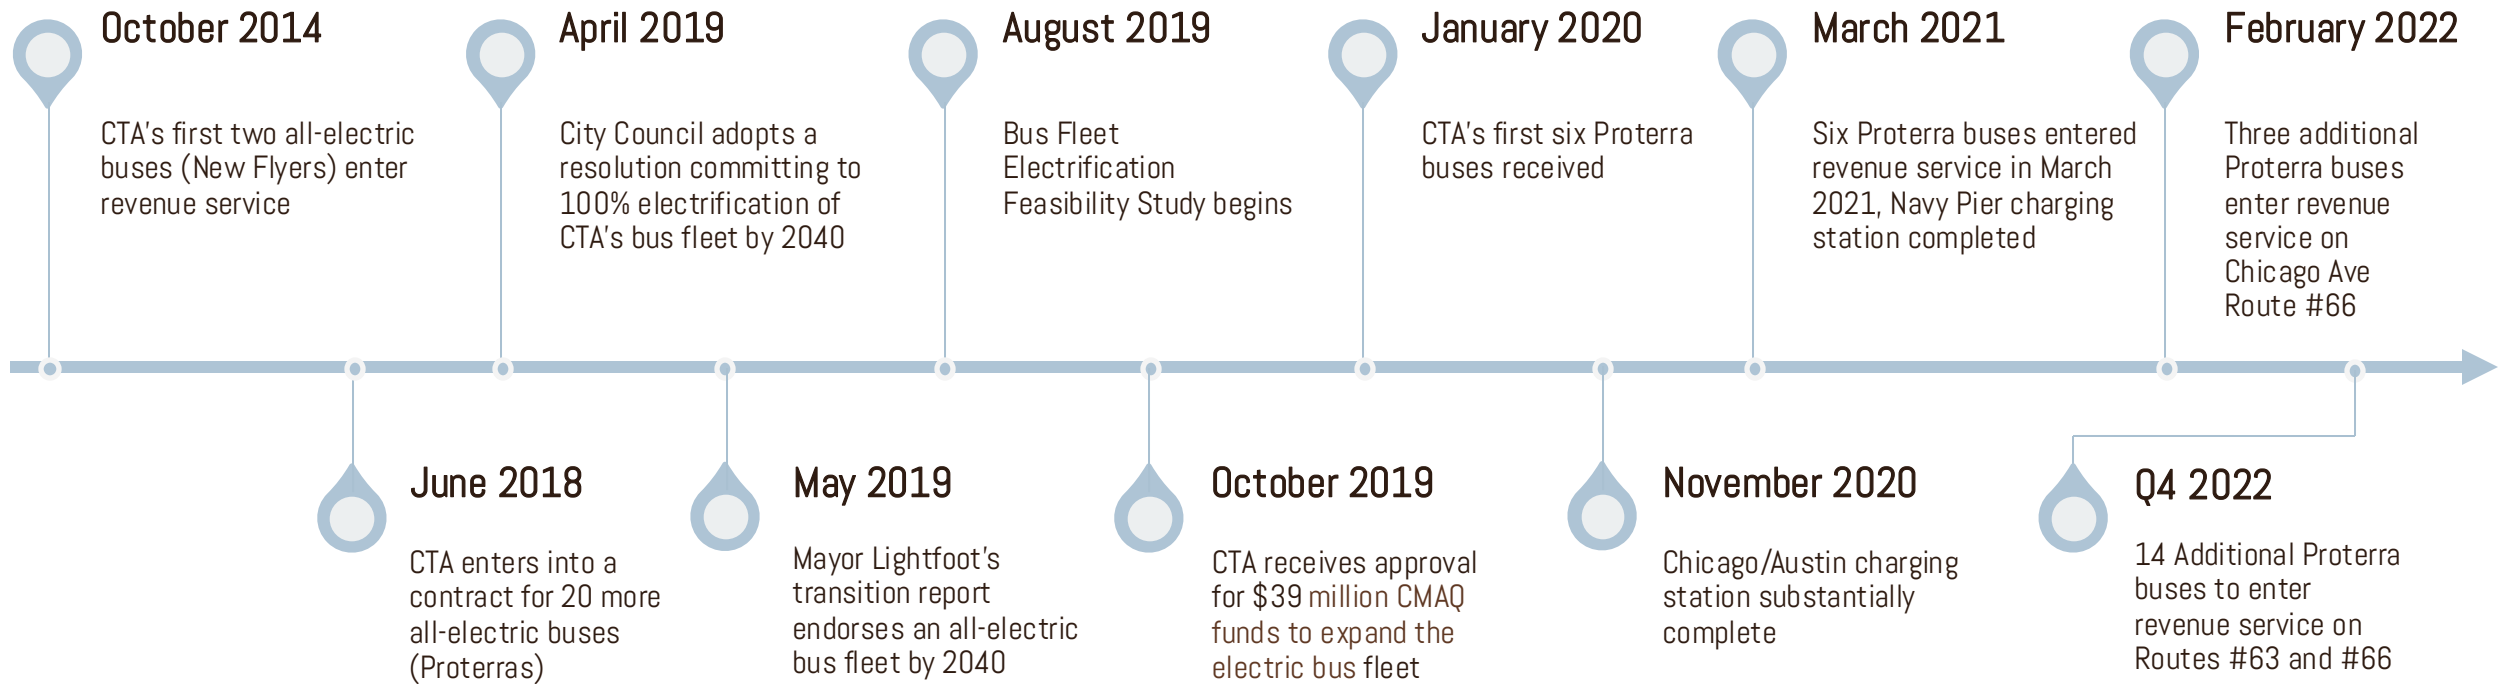

- Open ongoing channels of communication with user groups to increase buy-in and engagement
- Help users better understand their data so they can focus their attention on areas of critical importance
- Streamline data processes that help to maintain control and keep data consistent
- Improve upon the data used for overall capital investment and SGR

- 🔨 Facility upgrades to accommodate bus electrification
 - Construction of new garage by 2032
 - Significant modernization of two additional garages between 2035 and 2038

Prioritization Consideration:

The order in which facilities are upgraded is based on equity considerations and the need to space out major construction projects.

Electric Buses

The bus transition timeline is driven by the availability of e-bus-ready garage capacity, including installed charging infrastructure.

Figures represent purchases that would be needed to replace all buses after 14 years of age.

Potential Timeline for Transition of CTA Bus Fleet

CTA Funding Sources 2023-2027

Funding by Source

Federal Funding: \$2.56B (65%)

- 5307 Urbanized Formula
- 5337 SOGR
- ASAP
- Other

State / Local Funding: \$1.36B (35%)

- State PAYGO
- Other
- State Bonds

Red Ahead

The Red Ahead program is a comprehensive initiative for maintaining, modernizing, and expanding Chicago's most-traveled rail line. The program includes three major improvement projects: Red Line Extension, Red Line South (Completed 2013), Red and Purple Line Modernization (RPM)

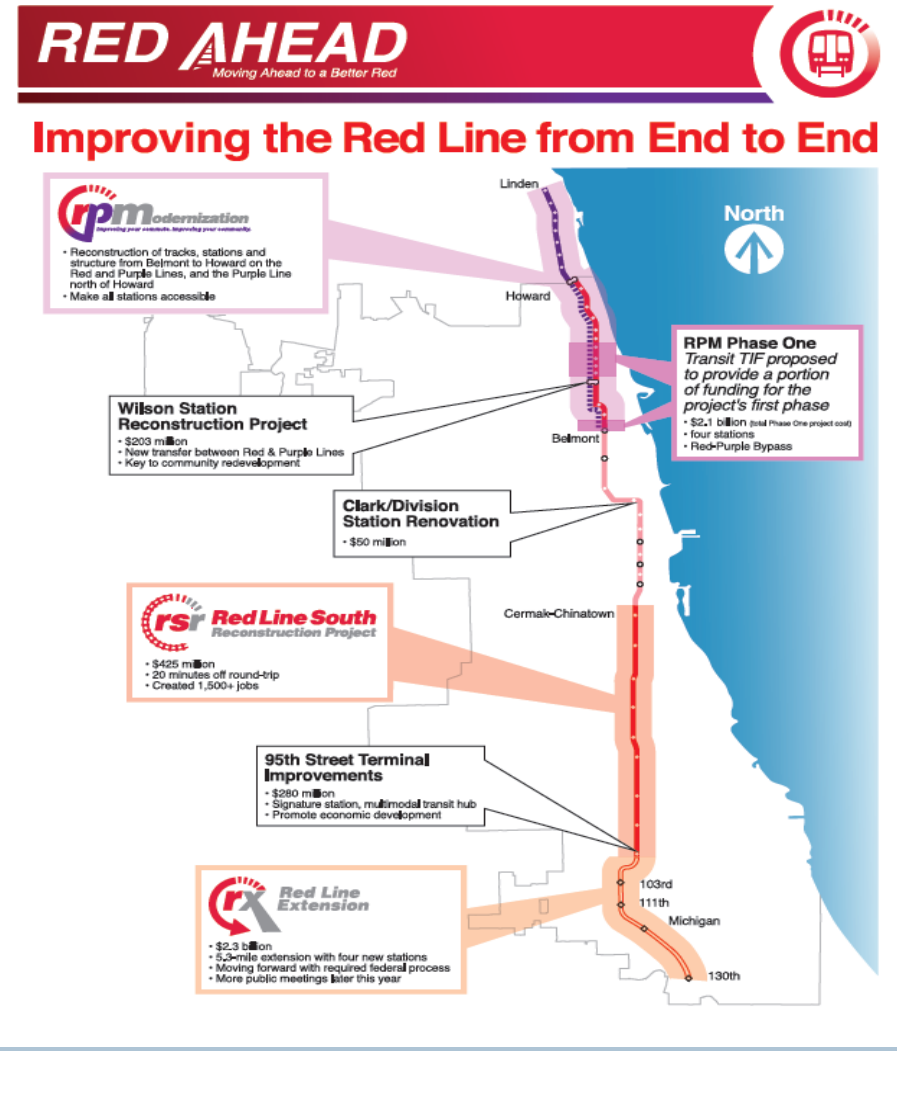

~26 miles long
~5 miles would
be added by the
extension

4 stations
would be added
by the
extension

Red Ahead

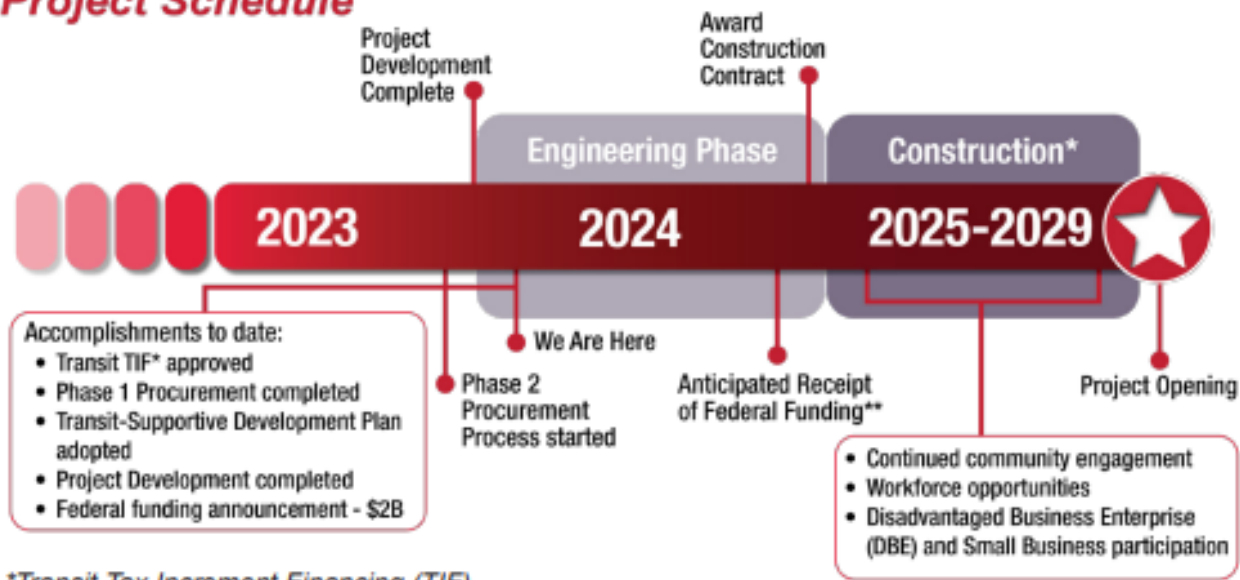

- Red Line South – \$425 Million track reconstruction and station rehabilitation project completed in 2013
- Clark and Division – \$86 Million new accessible entrance and renovation completed in 2015
- 95th St. Terminal Reconstruction – \$280 Million expansion and reconstruction completed in 2018
- Wilson Station – \$203 Million project completed in 2018
- Red/Purple Modernization – \$2.1 Billion Phase One project to be completed in 2025; Phase Two costs and schedule TBD
- Red Line Extension - \$3.6 Billion extension from 95th to 130th Street (targeted opening 2029)

Red Line Extension Overview

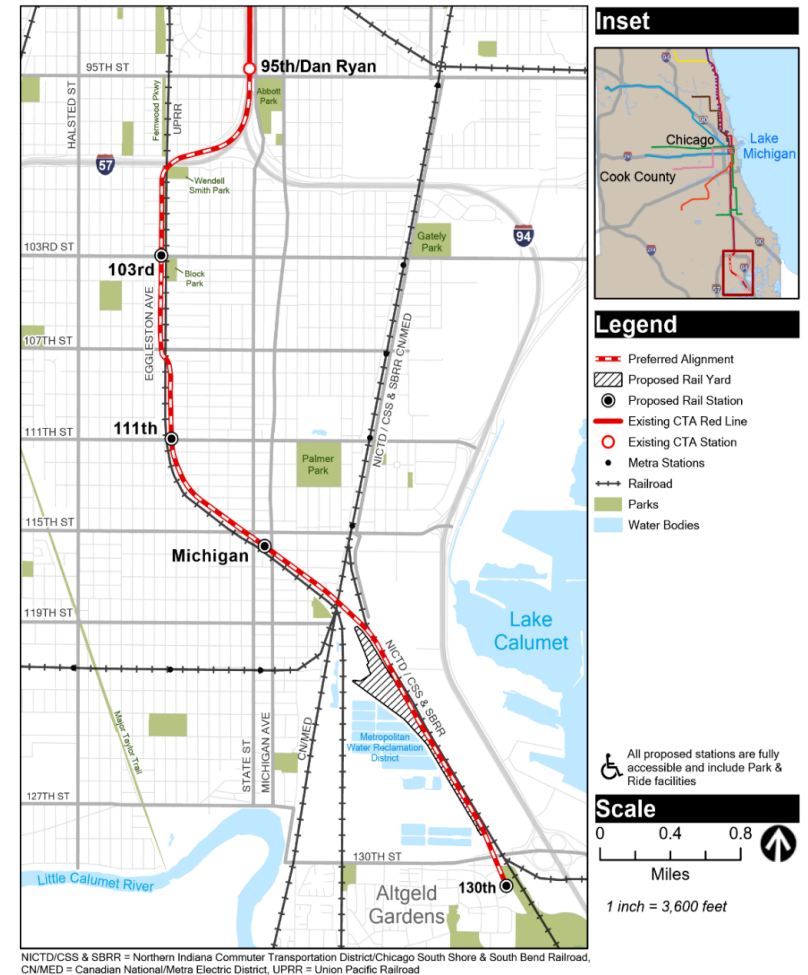

Extending the Red Line 5.6 miles and includes four new fully-accessible stations and is a vital part of our economic initiative.

Project Schedule

*Transit Tax Increment Financing (TIF)

**Preliminary timeline subject to change as project advances.

Equity-Focused RLE Project Highlights

- **Target Area Focus:** RLE serves a region with higher poverty and unemployment rates.
- **Commute Improvement:** Up to 30-minute time savings from 130th to the Loop.
- **Enhanced Job Access:** 46% more jobs accessible within a one-hour commute.
- **Economic Collaboration:** CTA and Chicago Department of Planning and Development jointly drive economic investment around future stations.
- **Critical Extension:** RLE extension is a vital part of this economic initiative.
- **Economic Opportunities:** Billions in economic opportunities and thousands of job prospects.
- **Federal Funding Potential:** Unique opportunity for significant Federal funding under the Biden Administration's equity-focused projects initiative.

RLE Strategic Plan Award

The CTA's Red Line Extension (RLE) Project "Transit-Supportive Development Plan" has won the 2023 Strategic Plan Award the American Planning Association – Illinois Chapter (APA-IL).

This notable award recognizes the CTA's vision and plan for transformational community impact related to the RLE project, which will build a 5.6-mile Red Line extension to 130th Street from 95th Street.

Red and Purple Line Infrastructure Overview

- **Century-Old Legacy:** Red Line North has a rich history spanning over 100 years and has urgent reconstruction needs.
- **Accessibility Gap:** Only 6 of 14 stations are fully accessible, creating a significant gap.
- **Outdated Signals:** Signal system in use for over 50 years.
- **Capacity Constraints:** Current infrastructure at maximum capacity; unable to handle more trains.
- **Peak Load Issues:** Overcrowding at key points (Belmont, Fullerton, North/Clybourn, Clark/Division).
- **Impact on Reliability:** Overcrowding leads to delays, affecting Red Line reliability.

Forest Park Branch Reconstruction

Erin Fiorini

Director, Infrastructure Capital Program Oversight

Chicago Transit Authority

Forest Park Branch Reconstruction

Congress Branch was built in 1958 alongside the I-290 expressway. Since then, only limited investment in tactical signal upgrades, limited investments at select stations, and routine track maintenance has occurred.

- Significant delays due to slow zones – 72.4% of the branch has slow zones
- Percentage of assets past their useful life: 77% of track, 61% of structure, and 79% of power
- 17.9 total miles of track, 8.8 total miles of structure
- Track condition is significantly beyond the useful life – worst average condition in the system and needs to be fully replaced, including drainage work
- Traction power upgrades are required to meet the projected demand
- 7 of 11 stations are not accessible
- Stations are exposed to expressway noise and harsh weather elements and need to be updated for accessibility
- Pedestrian access to the stations is constrained by the highway and narrow sidewalks
- The yard (built 1959) and shop (built 1962) is nearing end of useful life and is at capacity

Forest Park Branch Reconstruction

Status	Forest Park Stations
Completed	UIC Halsted 
In Construction	Racine
Completed	Illinois Medical District 
Unfunded	Western
Station Accessible	Kedzie-Homan 
Funded; in Planning	Pulaski
Unfunded	Cicero
Unfunded	Austin
Unfunded	Oak Park
Unfunded	Harlem
Station Accessible; but rebuild needed	Forest Park 

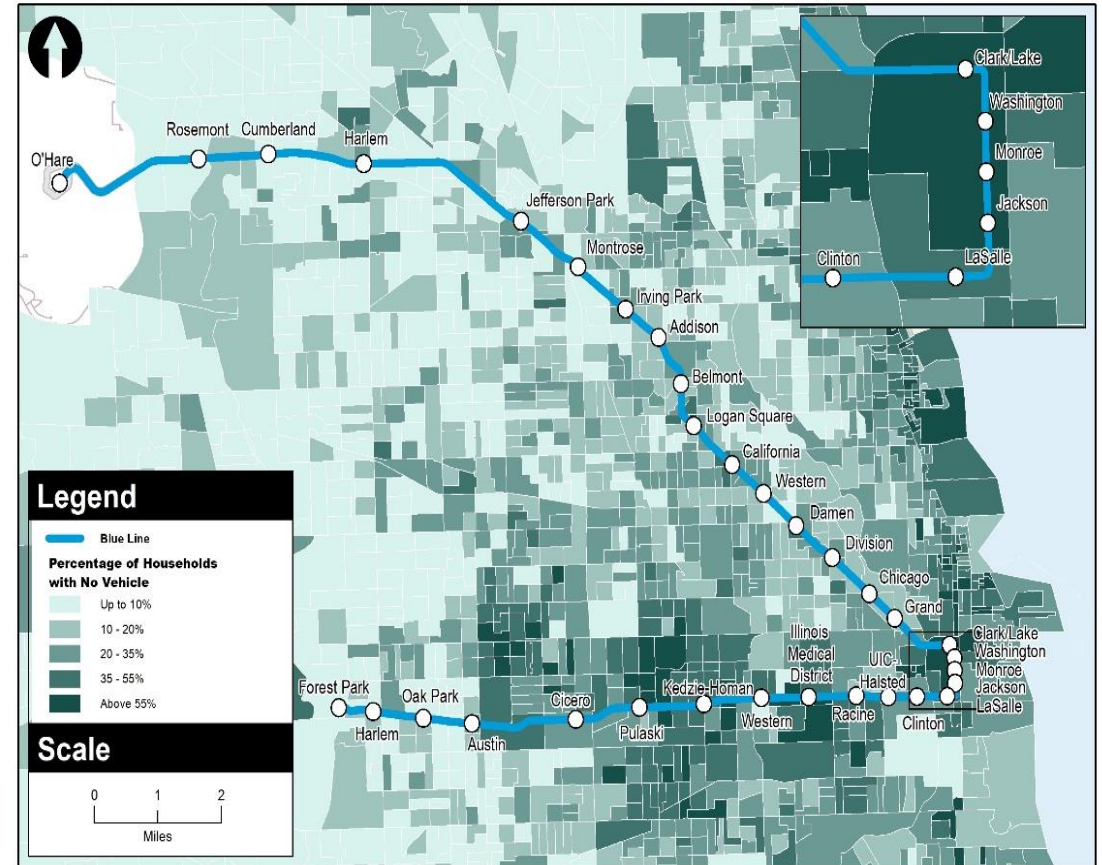

Out of the 11 Forest Park Branch stations:

- 4 stations are accessible today
- 7 stations are not accessible today, however, two stations (Racine and Pulaski) will be accessible, taking the total of remaining stations to be made accessible to 5.
- Racine station is estimated to complete construction in early 2025 and Pulaski Station is estimated to complete construction by end of 2028.

Forest Park Branch Reconstruction

- Forest Park Branch provided 8.5M annual boardings in 2019 and 3.9M annual boardings in 2022.
- Ridership grew along the corridor pre-pandemic. Average weekday boardings grew by 39% from 2000-2018 and by 19% from 2009-2018.
- Forest Park Branch serves diverse and minority communities.
 - 50% of the population within ½ mile is Black or African American
- Disadvantaged communities and Areas of Persistent Poverty in the corridor (within 1 mile):
 - 47 historically disadvantaged communities census tracts
 - 71 areas of persistent poverty census tracts
- There is high transit dependency and transit mode share in the corridor.
 - 32% of households within ½ mile are zero-car households
 - 29% of people within ½ mile commute via transit

Zero-Car Households

Source: Esri Business Analyst, 2020 Estimates

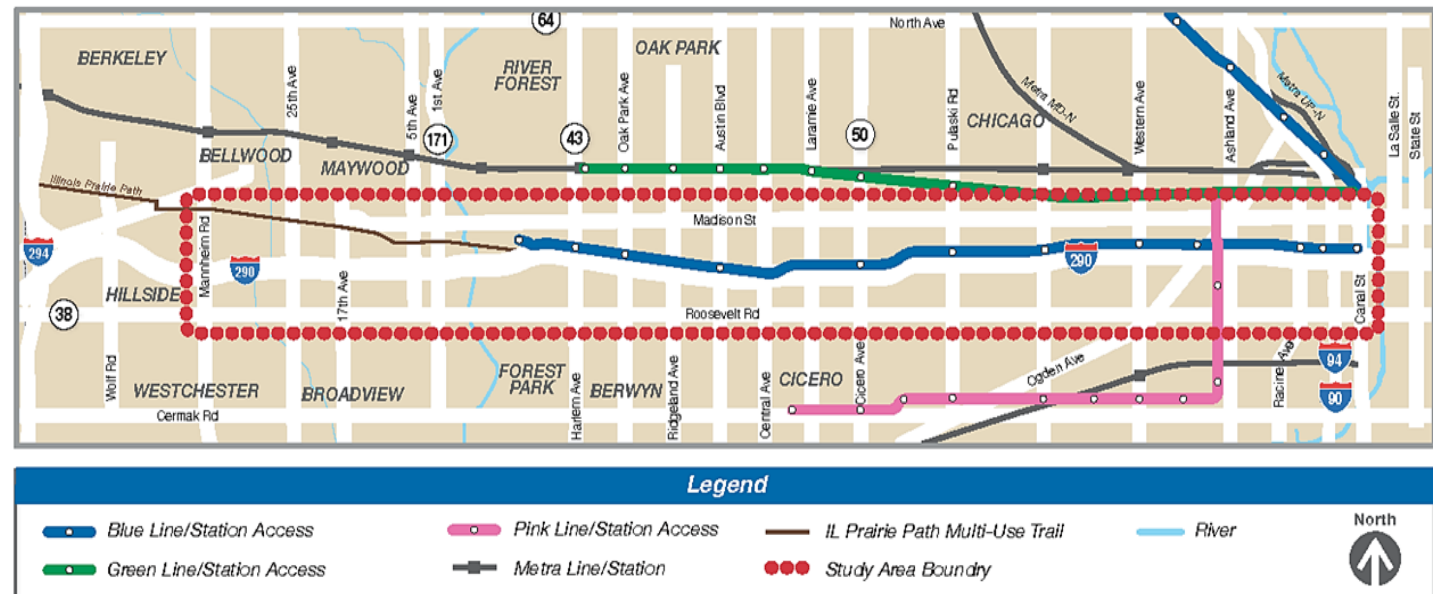

Forest Park Branch Reconstruction

Blue Line Vision Study, completed in 2017, identified improvements on the Congress Branch for State-of-Good Repair (SOGR) and Operational Improvements.

Study Recommendations –

- ▶ Rehabilitate infrastructure, starting with track work (address persistent slow zones)
- ▶ So far, 1.6 miles of track has been replaced (2020-2023)
- ▶ Propose wider station platforms and elevator access for each station
- ▶ Propose design features to improve customer experience including improved noise and weather protection and consistent aesthetics between stations
- ▶ Include a turn-back track to accommodate construction phasing
- ▶ Redesign the Forest Park Branch Terminal, Yard and Shop to modernize the maintenance area as well as bus and pedestrian connections

CTA Blue Line Vision Study Area

Forest Park Branch Reconstruction

- Maintenance work
 - In 2018, the City of Chicago provided \$3.9M in ride-hailing service fees for CTA maintenance forces to perform dedicated maintenance to the Forest Park Branch. CTA forces used those funds quickly by 2019 due to poor track conditions.
 - Since then, CTA forces use other infrastructure capital funds just to continue with spot tie replacement and ballast improvements throughout all sections of the Forest Park Branch to allow service to continue.
 - But this work alone is just a patch and is not enough to keep up with the deteriorating conditions. A complete rebuild of the tracks including the sub-ballast and drainage is necessary to restore the system back to a state of good repair.
- Rebuild IL Capital Program and City of Chicago TIF
 - In 2020, the State of Illinois established the Rebuild IL capital program that has brought over \$1B in Infrastructure upgrades to CTA, including a \$268M capital project to rebuild the Forest Park Branch track from Halsted to Illinois Medical District Station, Racine Station ASAP upgrades and the construction of the new Morgan Substation. The City of Chicago contributed \$21.5M in TIF funds for the track scope of this project.
- Further investment in the Forest Park Branch
 - CTA received a FY22 ASAP award for Pulaski Station.
 - CTA received a \$111M Reconnecting Communities NAE grant for more than a mile of trackwork replacement between the fully funded Pulaski ASAP station to Kedzie Avenue.

Forest Park Branch Reconstruction

Forest Park Branch Phase 1 Project

Total Project Budget: \$268M

Scope of Work:

- Track Reconstruction
 - Complete replacement of all track including subgrade, ballast, ties, rail, fasteners, and other material.
 - Reconstruction of the track drainage system.
 - Replacement of Morgan Middle turnouts
 - Reconstruction of wayside traction power and signal components to accommodate trackwork
- Traction Power Improvements
 - New substation over the right-of-way at Morgan Street
 - Upgrades of switchgear, transformers, and rectifiers at Hermitage Substation
- Racine Station Improvements
 - New elevator and station house renovations at main Racine entrance
 - Platform extension to new stairs at Racine entrance
 - Upgrades to the Loomis auxiliary entrance

Forest Park Branch Reconstruction

Rendering of new Racine Station house from expressway level

Rendering of new Morgan Substation

Forest Park Branch Reconstruction

- Track work needs to be the first project(s) done as this is a critical component of this branch. Repairs to the track are estimated at \$1B.
 - 77% of track is past its useful life
 - 70% of track is 66 years old
- Station work can be paired with track work packages, but could also be standalone work. Station accessibility on this line is estimated at \$750M.
- Final set of work includes substation replacements, yard replacement and new Terminal station. Current need is estimated at \$800M.

Forest Park Branch Reconstruction

- Other funding sought for the Forest Park Branch Reconstruction:
 - IDOT and CTA applied for a MEGA grant in FY22 and FY23 for bridge, track and stations between Cicero and Austin stations.
 - No awards were received for this project in either year
 - In FY24, CTA applied for the ASAP discretionary grant program to make Cicero and Austin stations accessible on the Forest Park Branch.
 - No award was received.
 - In FY24, IDOT applied for a Congestion Relief Program (CRP) discretionary grant on behalf of CTA for \$28M in funding to advance track design work on the Forest Park Branch from Western Ave to Lathrop Ave.
 - Allows future grant applications for track work to be considered shovel-ready.
- CMAP, CTA and IDOT have partnered to create a Corridor Development Office (CDO) to continue the vision of the Forest Park Branch Program. The goal is to keep momentum on this corridor to seek funding, coordinate projects amongst agencies, and bring this portion of the Blue Line back to a state of good repair.

- Application Overview
- Potential Use Cases
- Demo & Discussion

Upcoming Releases

U.S. Department of Transportation
Federal Transit Administration

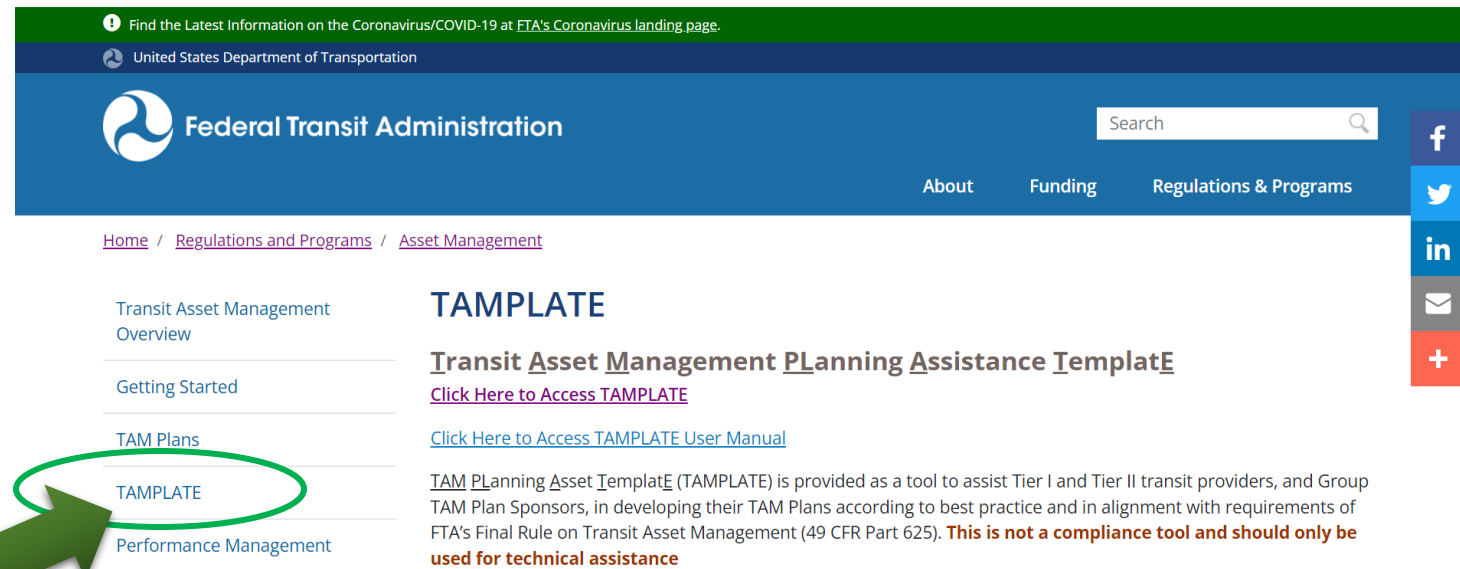

NTI Course: Introduction to Transit Asset Management (TAM)

- Introductory course for those that are new to TAM
- Original National Transit Institute (NTI) course was designed for in-person delivery
 - NTI stopped running it during the pandemic
- First offering is in September 2024, currently waitlisted, but more offerings to come
- [NTI Course Details](#)

TAMPLATE: New Functionality

- Ability for more than one person to edit a single TAM Plan
- All users able to share their plan with stakeholders/executives
- Infrastructure calculations for inventory and condition corrected
- Updated User Manual
- [TAMPLATE](#)

The screenshot shows the Federal Transit Administration website. At the top, there is a green banner with information about COVID-19 and a dark blue header with the FTA logo and navigation links. The main content area features a breadcrumb trail: Home / Regulations and Programs / Asset Management. On the left, a sidebar lists navigation options: Transit Asset Management Overview, Getting Started, TAM Plans, TAMPLATE (highlighted with a green circle and a green arrow), and Performance Management. The main content area is titled 'TAMPLATE' and contains the following text: 'Transit Asset Management Planning Assistance Template', a link to access the template, a link to access the user manual, and a paragraph explaining that TAMPLATE is a tool for transit providers and sponsors, not a compliance tool.

Peer Program

- Roundtable
- Webinars
- Peer Exchanges
- Peer Working Group
- Discussion Forums
- [Sign up for updates](#)

[FTA's Transit Asset Management \(TAM\) Program](#) is providing two opportunities for transit agency staff to engage with peers and share strategies and best practices about asset management, including a working group on asset condition and a peer exchange for best practices in aligning asset management activities with other FTA requirements.

2024 TAM Peer Working Group Call for Participation

The [FTA's Transit Asset Management \(TAM\) Program](#) is continuing the success of the 2023 TAM peer working group with a new opportunity for 2024. The group will convene 11-15 participants in an online forum to discuss best strategies for determining asset condition. The group will meet regularly for one year, focusing on various aspects of strategies for condition assessment. Throughout the process, participants will promote peer learning, share peer-designed resources, and collaborate on best practices.

Applicants for the virtual TAM peer working group should complete and submit [this form](#) by Thursday, November 16.

Winter 2024 Peer Exchange Call for Participation

In February 2024, the FTA TAM Program will host an in-person peer exchange to discuss how agencies approach aligning their TAM activities with other related FTA requirements, such as:

- NTD reporting,
- developing Public Transportation Agency Safety Plans (PTASPs), and
- preparing for Comprehensive Reviews.

State of the Practice Reports

- Identify AM processes and promote best practices
- There continues to be a need for skills and training for agency personnel
- Nine (9) Agency Reports
- Summary Report
 - **[Coming soon]**

LDA Topic Modeling on A-90 Narrative Reports

U.S. Department of Transportation
Federal Transit Administration

TAM Program Multiyear Evaluation

- Covered 4 years, 2019-2022
- Collected information through interviews, focus groups, TAM Program event registration/feedback, National Transit Database including Narrative Reports
- Agencies requested clarification on the NTD Narrative Report Instructions
 - Addressed in 2021 with the updated [Narrative Report Example Format](#)

Narrative Reports

- FTA received over 600 narrative reports from agencies in Report Year 2022
- Each report goes into detail on the state of the agency's transit assets
- Internal resource to analyze these reports

National Transit Database Narrative Report Example Format

Under the FAST Act and MAP-21, “transit providers are required to submit an annual narrative report to the NTD that provides a description of any change in the condition of its transit system from the previous year and describes the progress made during the year to meet the targets previously set for that year.”

This template is provided for your agency’s convenience. **These questions are not required** to be answered, but are meant to facilitate narrative reports that meet the federal requirements while also supporting your agency’s recordkeeping and justification of its TAM program. The information in each section is intended to illustrate the type of information that could be included rather than an exhaustive list.

Outputs

Agency Information:

TAM Plan Type: Individual TAM Plan / Tier I Provider

What challenges face your agency in making progress toward the targets?

Our first challenge is the availability of Paratransit vehicles. The agency has 9 cutaway buses on order that are delayed due to the nationwide parts back orders. This back order for new vehicles has increased the typical 6-8 month lead time from order to delivery to anywhere from 1 to 2 years.

Our second challenge is the cost of Paratransit vehicles. In 2018 the cost of a paratransit cutaway bus was \$85,896 per bus, in 2021 a bus cost \$109,914, and in 2022 the cost of the same bus is \$174,491 each. The ITP's plan to order 31 buses in January 2023 will need to be scaled back due to the increased cost since our last request for funding, which was based on pricing before the bus manufacturer's price increases.

Outputs

Agency Information:

TAM Plan Type: Individual TAM Plan / Tier II Provider

What challenges face your agency in making progress toward the targets?

Due to issues with supply chain buses and bus part are creating significant issues with SGR. High[er] than anticipated mileage is accumulating on the fleet as buses are waiting 90+ days for replacement parts.

The transition to zero emission buses is also causing issues, attempting to balance new CNG bus orders with planned Electric Bus orders.

Capital funding is also challenge. We can not begin the transition to electric buses until we secure funding to [construct an] electric charging station.

U.S. Department of Transportation
Federal Transit Administration

TAM Best Practices

Virginia Department of Rail and Public Transportation

Zach Trogon, DRPT Acting Director

July 31, 2024

Virginia Department of Rail and Public Transportation

 DRPT is the only state-level agency to participate in the State of the Practices Review.

 DRPT's Group TAM Plan provides the required plan for 33 Tier II agencies across the state. These are agencies that operate 100 or fewer vehicles across all modes in peak service.

 There are 6 Tier I agencies in the state that are required to maintain their own Plans.

 First TAM Plan was developed and adopted in 2018 and the most recent is October 2022. The State of the Practices Review was completed in early 2024.

Our Setup

DRPT developed a new scoring and prioritization process for funding around the same time as regulations for TAM were being finalized.

The new process relied heavily on asset management principles by placing a high priority on funding projects to maintain State of Good Repair (SGR)

DRPT focused on the asset categories and performance measures from the TAM Final Rule: Rolling Stock, Equipment, and Facilities.

Performance Targets

Revenue Vehicle and Equipment/Service Vehicle Performance Targets

Asset Class	ULB	Target 2022
AB- Articulated Bus	14	5%
BU- Bus	14	15%
CU- Cutaway	10	10%
MV- Minivan	8	20%
BR- Over-the-Road-Bus	14	15%
VN- Van	8	20%
AO – Automobiles (non-revenue)	8	30%
TX – Trucks and other rubber tire vehicles (non-revenue)	14	30%

Facilities Performance Targets

Asset Class	TERM	Target 2022
Administrative/ Maintenance Facilities	<3.0	10%
Maintenance Facilities	<3.0	10%
Passenger Facilities	<3.0	15%
Parking Facilities	<3.0	10%

Recommendations

- Incorporate TAM principles in state law and mandate a statewide transit asset SGR prioritization process based on technical scoring.
- Provide – or at least acknowledge the possibility of having – a formal “bypass” process to treat unforeseen needs or strategic SGR programs.
- Encourage the development of a statewide transit asset database to use for a prioritization process that can interact with most of the systems used by local agencies.
- Create a TAM Plan oversight unit that reports directly to the Chief Executive Officer (CEO) or Deputy CEO to support the agencies’ asset owners and have one specialist responsible for each agency or for a group of agencies.

† SCRRRA shared responsibility for ARROW Maintenance Facility

Best Practices Review Pilot – Summary of Key Findings

- Strengths:
 - Organization/Leadership participation is strong
 - AM unit is robust and knowledgeable
 - Communication of AM factors is strong and fosters a culture that embraces AM principles
 - Strong alignment to Strategic Plan
 - The use of SGR data through various systems reflect forward-thinking approach and merging into a single system of record
- Limitations:
 - Enhancements needed for Trapeze EAM to fully realize intended potential
 - Decision support tools are informal or ad hoc. The lack of a formal, data-driven condition-based support tool means decisions are not made while considering the full life-cycle cost.
 - A formal plan for education and training is missing
- Raised awareness and importance of TAM
- Provided a good progress report on maturity level for agency and for the AM Champion

AM Recommendations

Moderated Q&A

Audience Q&A

Small Group Discussion Questions

- Discuss the various types of evaluation for TAM programs and plans that we've heard about during the past two days. What are some benefits and concerns related to:
 - An internal review?
 - A review done by an outside consultant?
 - A review done by FTA's TAM Program?
- After hearing from panelists, how might your participation in this type of technical assistance help to improve your organization's TAM practices/procedures?
- Are there specific concerns or obstacles that could hinder your organization from participating?

Report Back

Wrap up & Evaluation

Thank you!

U.S. Department of Transportation
Federal Transit Administration

Standard Operating Procedure	SOP #	Date:	Page 1 of 12
Asset Management	500-010- 03-20-2024	03-20-2024	REVISION 3C
Title: New Asset Identification			

Department Classifications: **Bi-State Development**

Issued by: Sheila Hockel Program Manager-Transit Asset Management

DocuSigned by:
 4/12/2024
 03E452F5508C45C...

Supersedes: Revision 2 dated: 11-30-2022

I. PURPOSE

The purpose of SOP 500-010-03-20-2024 rev 3A is to document the sources of where new assets may be identified, ultimately to be entered into the Trapeze Enterprise Asset Management (**EAM**) facilities and rolling stock database.

- II. **OBJECTIVES** – A more complete EAM asset list will support Metro’s fiscal responsibility goal. Preventative maintenance and state of good repair (**SGR**) are more completed with a complete and comprehensive list of assets.

III. DEFINITIONS –

ATP- Acceptance Test Procedures
 EAM- Enterprise Asset Management
 FYI- For-Your-Information
 OEM- Original Equipment Manufacturer
 SGR-State of Good Repair
 SOP-Standard Operating Procedure
 TAM-Transit Asset Management
 VMD-Vehicle Maintenance Department

IV. RESPONSIBILITY –

Transit Asset Management (**TAM**) Department is responsible to read and revise this standard operating procedure (**SOP**) on an annual basis and when the process changes. After revision, TAM will ensure distribution and discussion with SOP and EAM users. TAM will maintain relationship with Procure and support the Engineering Department’s project control process.

Supervisors using EAM, are responsible for reading and asking questions about the supervisor and new asset identification process.

Standard Operating Procedure	SOP #	Date:	Page 2 of 12
Asset Management	500-010- 03-20-2024	03-20-2024	REVISION 3C
Title: New Asset Identification			

All cost center managers that operate in EAM are responsible to notify and provide new equipment information within 30 days of asset installation.

Financial Reporting Department is responsible for Form 0221 process and participating in review, comment and signing of this SOP.

Engineering Department project control will participate in the review, commenting and signing of this SOP.

V. PROCEDURES/PROCESS

There are several sources that TAM may receive new asset information. They include the following sources.

1. **New Equipment Form** – The new equipment form is completed by the asset owner when an asset is being replaced or purchased, or the project manager if the asset is replaced during a managed project. The new equipment form is found on the HUB under Forms and Metro, Transit Asset folders. The completed form is sent to TAM TAM@MetroStLouis.org.

Non revenue rolling stock, such as trailers, man-lifts, lawn equipment and forklifts, will be sent to the truck shop at Central Facility, to be entered into EAM. Additional details pertaining to the nonrevenue vehicle process is listed in No. 5 of this section.

2. **Form 0221 Request for Disposal and Replacement of Fixed Asset** - At the start of a project, prior to disposal of assets, the maintainer of the assets and/or the project manager of the project, will complete Form 0221 to receive direction as to the proper disposal of the asset. The request for disposal is submitted to the Finance Department. The Finance Department Disposal of Asset Policy is attached.

The new equipment form is included in Form 0221 process. TAM will receive the completed new equipment form after the equipment has been received. Form 0221 will be closed after the new equipment form is received.

Form 0221 is found on the HUB and at <W:\Forms\0221 Request for Disposal Fixed Assets.xls> and <W:\Forms\0221 Revised Request for Fixed Asset Disposal.xlsx>. A copy is attached.

3. **Annual Asset Condition Rating Review** - Asset condition rating review is conducted annually. The asset owner receives a list of assets with condition ratings from the TAM department. When the condition rating is revised to a 5 (excellent), the asset owner identifies whether the asset is new or refurbished. This action can also be addressed through source 1 above.
4. **Review of completed purchase requisitions** - TAM receives a For-Your-Information (FYI) copy of purchase requisitions. The purchase requisition is entered

Standard Operating Procedure	SOP #	Date:	Page 3 of 12
Asset Management	500-010- 03-20-2024	03-20-2024	REVISION 3C

to the New & Retired list at <\\Metros07\workgroups\Maintenance Reports\Monthly\4 SALE & AUCTION LISTS\EAM To be entered in EAM\New & Retired EAM Assets .xlsx> as either a new asset or not a new asset.

- 5. Leased and Other Non Revenue Vehicles** - New leased and other non revenue vehicles, trailers, and gas/diesel powered equipment; and landscaping equipment ordering process is as follows.
- a. All non revenue vehicles and equipment, trailers, and gas/diesel powered equipment; and landscaping equipment are ordered through the Superintendent Main Shop and Paratransit (Thomas Spurgeon in 2023) and the Supervisor Non Revenue Maintenance-Main Shop (Darren Palmberger in 2023). For example, this includes forklifts, mobile vehicle lifts, and man lifts.
 - b. Leased vehicles are ordered by the Superintendent Main Shop and Paratransit through the Enterprise web site or other appropriate vendor. Replacement information concerning current vehicle operator is provided to Enterprise or other vendor.
 - c. License plates are ordered by TAM and provided to the Supervisor Non Revenue Maintenance-Main Shop. Order information is provided to the Rolling Stock System Administrator (Amanda Winters), who orders the license plates for the new vehicles. The Supervisor Non Revenue Maintenance-Main Shop (Darren Palmberger in 2023) receives and arranges for the license plates to be delivered to Enterprise or other vendor for installation on vehicles.
 - d. Enterprise or other vendor delivers the vehicles to the Supervisor Non Revenue Maintenance-Main Shop. The Supervisor Non Revenue Maintenance-Main Shop does the following
 - i. Arranges Metro driver/vehicle swap.
 - ii. Provides Metro insurance card and Enterprise program book.
 - iii. Provides TAM with the mileage, new vehicle operator name and who is responsible.
 - iv. Arranges disposal of non revenue vehicles to be picked by Enterprise and arranges title transfer.
 - v. Maintains the list of new and disposed vehicles.
- 6. Revenue Vehicles** - New revenue vehicles ordering process is as follows.
- a. Director Quality Assurance and Training (Geoffrey Kehr in 2024) will incorporate the General Managers of Paratransit (Call-A-Ride) (Geffrey Butler in 2024) and MetroBus (Marlon Stacker in 2024) in the development and review process of new vans and busses prior to ordering new vehicles.
 - b. Revenue vehicles are ordered by Director Quality Assurance and Training. The VMD New Bus Information form is started as In-Preparation.
 - c. Buses are delivered to Director Quality Assurance and Vehicle Maintenance

Standard Operating Procedure	SOP #	Date:	Page 4 of 12
Asset Management	500-010- 03-20-2024	03-20-2024	REVISION 3C
Title: New Asset Identification			

Department (**VMD**), who inspects the buses upon arrival. The Director Quality Assurance and VMD oversees the acceptance test procedures (**ATP**) for Original Equipment Manufacturer (**OEM**)

- d. The VMD New Bus Information form is completed and provided to TAM. The VMD New Bus Information form is attached.
- e. When a vehicle is approved for and then disposed of TAM is notified.

7. **Procore Project Close Out** - Procore is the Engineering Department's project management program. Procore may be used by other departments for project management. A project charter should include responsibilities for reporting equipment removed and added to Property, to TAM.

At the end of the project, the project close out action plan check list includes the identification of new assets to TAM. The TAM new equipment form is included and will be completed and provided to TAM.

VI. DOCUMENT REVIEW

A draft SOP will be distributed in electronic form to the applicable staff members. A time of approximately two weeks will be allotted for comments and revisions. Once all comments and revisions are returned within the specified time frame and have been discussed by the team, the SOP author will review the final draft and if approved by the Program Manager-TAM, the final draft will then be sent out for approval and sign off by all team members.

VII. CONCURRENCE SIGN-OFF

Following the publication of the final document, the concurrence sign-off form (Attached) will be distributed for signature by all team members. Service Advisories and Alerts do not require sign-off before distribution.

VIII. REVISIONS

Operating procedures, new equipment, and legal requirements may warrant revisions to existing documents. This policy allows for revisions to any published document.

Policy for Disposal of Assets

Policy:

It is the policy of the Agency to sell and dispose of assets and property no longer needed for Agency purposes. Such sale and disposition shall be for fair market value or appraised value, unless otherwise approved by the Board. The Chief Procurement Officer shall be responsible for establishing procedures regarding the sale and disposal of excess equipment, materials and supplies.

Cost center managers are responsible for maintaining control over and safeguarding of assets. Disposal of any asset is initiated by a cost center manager completing a disposal form located on W: Forms/0221 Request for Disposal Fixed Assets.xlt and forwarding the completed form to the Fixed Asset Accountant. In order to maintain the proper information on asset disposals and assure compliance with all federal requirements, all requests should at least include tag number, if available, and reason for disposal, method of determining fair market value and the necessary approvals required on the form. (Disposal means sold, scrapped, lost, stolen, or retired).

The Fixed Asset Accountant will identify if there is any federal and/or state grant funding contributed toward this asset. If so, it's documented on the form with the grant award number and grant percentage of the federal and/or state interest. Any federal and/or state interest will require notification to FTA or other state agency. Therefore, this form will be forward to Capital Budgeting and Grants. If the estimated fair market value (FMV) is \$5,000 or greater, then the approval by the Controller is required. If the disposed asset will be sold or scrapped, then the form will be forward to the Procurement Department. If the disposed asset is to be written off, the Fixed Asset Accountant will retain the form as documentation to remove from fixed assets in Oracle.

The Director of Program Development, Capital Budget and Grants is required to notify FTA and/or other state agency of the Agency's request to dispose of assets, which are no longer needed, lost, stolen, or retired. A letter is sent requesting concurrence to dispose or notifying of our intent to dispose of asset that has met its useful life. If an asset has a FMV greater than \$5,000, unamortized value (book value) or receipts of proceeds greater than \$5,000, then the grant percentage owed to FTA must be reimbursed. "In lieu of returning the Federal share to FTA, the Agency may elect to use the proceeds from the asset to acquire a similar asset of like kind. Under the Like-Kind Exchange Policy,

Standard Operating Procedure	SOP #	Date:	Page 9 of 12
Asset Management	500-010- 03-20-2024	03-20-2024	REVISION 3C
Title: New Asset Identification			

proceeds from the asset sales are not returned to FTA; instead, all proceeds are invested in acquisition of the like-kind replacement asset."³ With the concurrence from FTA, a liability for like-kind exchange is setup in the Agency's general ledger.

Assets to be sold or scrapped are forward to the Purchasing Department to be put out to bidders for sale. "If equipment is sold, and less than \$100,000, then the President & CEO is authorized to approve contracts disposing of assets based on Board policies."¹ "If real property is disposed, then authorization is needed based on Board policies."²

- (1) In accordance with Board policies of Bi-State Development Agency Chapter 50-5, J.2 effective 08-14-2009, "The President & CEO is authorized to approve contracts disposing of assets (excluding real property) having a fair market or approved value up to \$100,000. The Board of Commissioners shall approve all sales and dispositions in excess of \$100,000 fair market or appraised value."
- (2) In accordance with Board policies of Bi-State Development Agency Chapter 40-3, A.1-3 effective 01/27/2012, "The Board of Commissioners shall approve any dispositions of real property where the appraised value exceeds \$250,000. The President & CEO is authorized to approve any disposition of real property where the appraised value is \$250,000 or less. The Vice President of Economic Development is authorized to approve any disposition of real property where the estimated value is \$100,000 or less."
- (3) In accordance with FTA C 5010.1D Chapter IV-26, I.6 effective 11-01-2008.
